DCTMA
102 W. Front Street
Media, PA 19063

www.dctma.org
DCTMA is pleased to welcome this year’s keynote speaker...

Kenneth McClain
District Executive, PennDOT District 6-0

This conference will give attendees the opportunity to network and exchange ideas for improving the county’s transportation network.

Who Should Attend:
Municipal Managers, elected officials, engineers, road and highway managers, maintenance crews, emergency services personnel, environmental, zoning, and planning committee members are sure to benefit from this networking and learning opportunity. More than 200 planning officials, engineers, and other transportation industry experts from municipalities throughout Delaware County are expected to attend.

THREE BREAKOUT MEETINGS
Meetings will be held from 8:00-9:00 a.m.

1. DCTMA Board of Directors Meeting
The Delaware County Transportation Management Association’s Board of Directors will host their quarterly meeting.

2. Delaware County Coastal Zone Task Force
The Delaware County Coastal Zone Task Force meets quarterly. The organization is made up of municipalities, businesses and interested stakeholders in the coastal zone. The 13 municipalities which lie within the area have unique land use and TDM opportunities, aesthetic, environmental, cultural, recreational and historic opportunities that this group strives to preserve and promote.

3. Delaware County Incident Management Task Force:
This task force was established to focus on the limited access highways of I-95 and I-476 in Delaware County. The purpose of this group is to foster communication and cooperation between organizations that are involved in responding to traffic incidents in the complex and congested interchange areas, to identify the incident management needs to alleviate that congestion, and to address those needs through funding, training, and other programs.

DCTMA Board Meeting
• Delaware County Coastal Zone Task Force
• Delaware County Incident Management Task Force

9:30 – 10:30 a.m. – Keynote Speaker
Kenneth McClain, District Executive, PennDOT District 6-0 (1 PDH)

Electric Vehicle Charging Stations:
Lindsay Hertzog, Account Executive, ChargePoint, Inc.

12:30 – 1:30 p.m. – Lunch & Networking in the Exhibit Area

SPECIAL BREAKOUT SESSIONS
Sessions will be held from 11:30 a.m.-12:30 p.m.

DVRPC Municipal “Toolbox”:
The Delaware Valley Regional Planning Commission (DVRPC) is responsible for long-range planning at the regional scale, but implementation of the plan—and much of our collective future—is based on how the region’s 352 municipalities use their home-rule authority to influence land use, provide public services, protect natural and historic resources, and, ultimately, create the places we call home. DVRPC provides different forms of technical assistance to help local governments tackle challenges today to improve or retain the region’s competitive advantages for tomorrow. The latest resource comes in the form of a new Municipal Implementation Toolbox. The online Toolbox serves as a guide for municipalities to help implement the goals and 5 Core Principles of Connections 2045, the region’s Long-Range Plan. Jackie Davis will present on the Toolbox, and will give a live demo of its contents.

Leveraging your Tax Revenue to Fund Transportation Projects:
This session will present an overview of powerful local, state and federal public funding sources that can be secured for municipal transportation projects. Learn how municipal tax revenue and bonds can be used as matching funds to leverage grant funding for your local roadway, bridge, trail and connectivity projects. We will discuss the full process, from identifying the right programs, applying for the funding, and ways to engage stakeholder support to achieve successful outcomes. The session will also set expectations for how to successfully meet compliance requirements, including some of the compliance pitfalls to avoid.

Electric Vehicle Charging Stations:
Lindsay Hertzog, Sales Director with ChargePoint will be providing a comprehensive look at the current and future trends of the EV market and how ChargePoint, the world’s largest network of EV charging, is helping to shape this landscape. Electric mobility is the smart choice. ChargePoint makes it the easy one, too. For more than a decade, we’ve been building the fueling network of the future. Now, someone plugs into the ChargePoint network every two seconds. ChargePoint has delivered more places to charge than anyone else, and people count on us for charging all day, every day. Passenger cars, fleet, delivery vehicles, buses and more—we charge any EV, anywhere it goes. We’ve built a fully integrated portfolio of hardware, cloud services and support with the best technology in the industry. Lindsay will go over everything we need to know about EV charging stations and how to bring more of them to our region.
